

DURA-TECH® STABLEHAND™ HAYNET FILLER

What a fantastic idea! This StableHand™ is just that, it is like having another set of hands in the stable, garden or wherever you are where you need to fill a bag. Simply roll the StableHand™ up and place it into the opening of a hay bag, haynet or whichever bag you want to fill – the StableHand™ will hold the opening open and upright. Simply fill it up and then remove the StableHand™. It is that easy!
